Goals
The advent of the Affordable Care Act has much in it which will transform American health care and is helpful to anesthesiologists from the perspective of building upon our unique and exceptionally strong legacy of patient safety and quality patient care. This program will expand our accomplishments in patient safety to quality improvement, root cause analysis, data reporting, and extension into community activities as well as using evidence based medicine in our practices and guideline development for our practices. Additionally NESA recognizes the failings of malpractice law for patients, physicians and the healthcare system and will devote our Little Lecture to one transformative program empowered by recent changes in Massachusetts law involving full, open communication, apology and resolution. Detailed objectives are found in the syllabus of talks for each session in the program.

OBJECTIVES
See objectives listed under each presentation.

ACCREDITATION
This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Massachusetts Medical Society through the joint providership of the Massachusetts Society of Anesthesiologists, Inc. and the New England Society of Anesthesiologists.
